# EDGE STAND

## What Is EdgeStand?

EdgeStand is a stand-up pouch with a completely innovative structure in which the skirt-like base on the bottom of the packaging props it up to enhance the packaging's self-standing nature.

### Characteristics

**Self-standing** A skirt around the bottom edges of the packaging extends up the sides and integrates with the bag element to make the pouch stand up on its own.

**Contents** As everything including the skirt is made of a single piece of laminated film, it can be used for solids or powders.

**Material Composition** Great versatility in terms of potential material compositions.

**Eco** An eco-friendly film pouch that is lighter than paper boxes, plastic containers, and metal cans.

**Filling** The supplied film roll supports vertical and horizontal pillow packaging machines.

## Winner of the Good Design Award

EdgeStand won the Good Design Award.

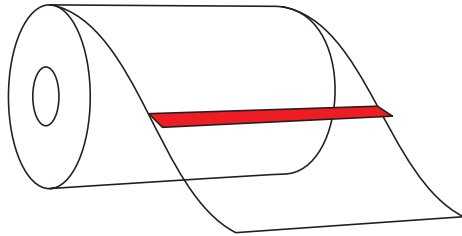

Organizer: Japan Institute of Design Promotion  
Also known as: G Mark

# How to Fill EdgeStand

Chokoku Plast can supply rolls compatible with pillow packaging machines. There are two methods for filling Edge Stand packaging.

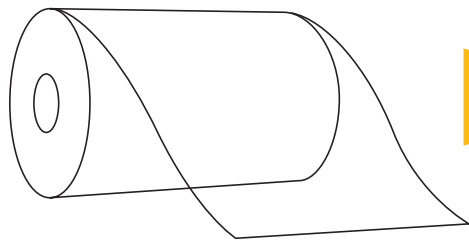

**1. Off-line method** Chokoku Plast supplies self-manufactured film rolls with a skirt base to its customers

Supply

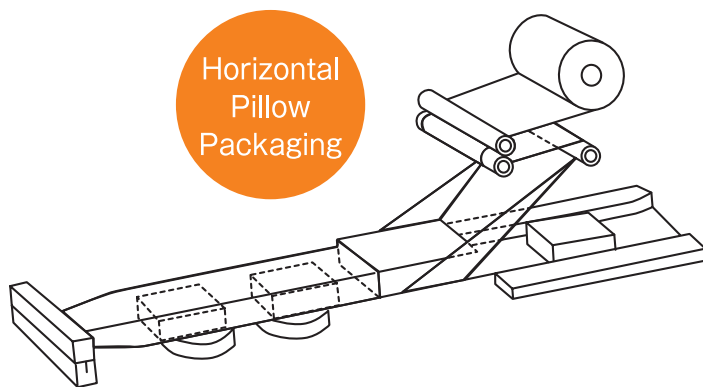

**Pillow Packaging Machine**  
 \* Modifications may be required. Please contact Chokoku Plast for details.

**2. In-line method** Chokoku Plast supplies self-manufactured film rolls without a skirt base to its customers

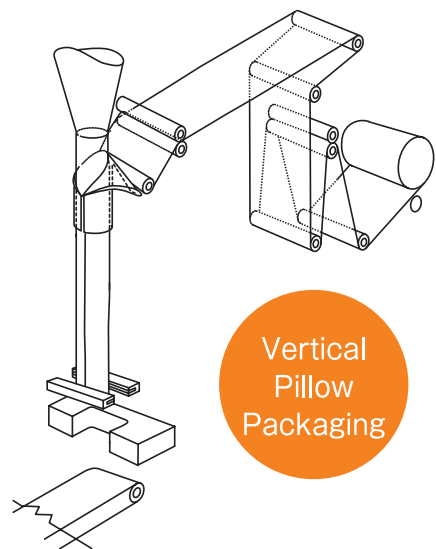

Supply

**EdgeStand In-Line Packaging System<sup>PAT</sup>**  
 A pillow packaging system with a built-in feature that adds skirt bases. Watch footage of the system in action from the Chokoku Plast website.

Horizontal Pillow Packaging

Vertical Pillow Packaging

## Flexible Machine Concept

Both the vertical pillow packaging machines and horizontal pillow packaging machines have a flexible and simple design that can be used for both EdgeStand and regular pillow packaging.
